Week 2 Quiz

LATEST SUBMISSION GRADE

100%

---

1. **How do you use Image Augmentation in TensorFLow**

   `1 / 1 point`

   ⦿ **Using parameters to the ImageDataGenerator**

   ◯ **With the keras.augment API**

   ◯ **You have to write a plugin to extend tf.layers**

   ◯ **With the tf.augment API**

   ✓ Correct

2. **If my training data only has people facing left, but I want to classify people facing right, how would I avoid overfitting?**

   `1 / 1 point`

   ◯ Use the 'flip_vertical' parameter around the Y axis

   ⦿ Use the 'horizontal_flip' parameter

   ◯ Use the 'flip' parameter

   ◯ Use the 'flip' parameter and set 'horizontal'

   ✓ Correct

3. **When training with augmentation, you noticed that the training is a little slower. Why?**

   `1 / 1 point`

   ◯ Because there is more data to train on

   ⦿ Because the image processing takes cycles

   ◯ Because the training is making more mistakes

   ◯ Because the augmented data is bigger

   ✓ Correct

4. **What does the fill_mode parameter do?**

   `1 / 1 point`

   ◯ There is no fill_mode parameter

   ◯ It creates random noise in the image

   ⦿ It attempts to recreate lost information after a transformation like a shear

   ◯ It masks the background of an image

   ✓ Correct

5. When using Image Augmentation with the ImageDataGenerator, what happens to your raw image data on-disk.

   `1 / 1 point`

○ It gets overwritten, so be sure to make a backup

○ A copy is made and the augmentation is done on the copy

◉ Nothing, all augmentation is done in-memory

○ It gets deleted

✓ **Correct**

6. How does Image Augmentation help solve overfitting? **1 / 1 point**

○ It slows down the training process

◉ It manipulates the training set to generate more scenarios for features in the images

○ It manipulates the validation set to generate more scenarios for features in the images

○ It automatically fits features to images by finding them through image processing techniques

✓ **Correct**

7. When using Image Augmentation my training gets... **1 / 1 point**

◉ Slower

○ Faster

○ Stays the Same

○ Much Faster

✓ **Correct**

8. Using Image Augmentation effectively simulates having a larger data set for training. **1 / 1 point**

○ False

◉ True

✓ **Correct**
